

Mini-Wreath Fabric Ornament

MATERIALS YOU WILL NEED:

- The ring portion of a mason jar lid (we think the smaller size looks better)
- Scissors
- Fabric strips – we suggest at least two different but complementary fabrics. Homespun or plaid would make a nice country look but any Christmas fabrics would be appropriate.
 - Prepare 6 or 7 strips of each fabric, each cut about 1” wide and 4-5” long
- Button for accent
- Ribbon or twine for bow and hanger. Jute twine looks rustic.
- Glue to attach button and bow.

STEP ONE: CUT FABRIC INTO STRIPS

Your strips will need to be about 1 inch wide and 4-5 inches long. You can play around with different lengths to see what you like best for these fabric ornaments.

STEP TWO: TIE FABRIC ON TO MASON JAR LID RING

Do a simple tie around the ring to attach the fabric to the mason jar lid, similar to the first step of tying your shoelaces. Continue to fill in around ring until it's all covered

STEP THREE: MAKE JUTE HANGER

For the hanger, make a circle of jute twine about 3 inches wide around the ring and secure with a dab of glue.

STEP FOUR: ATTACH JUTE BOW AND BUTTON

Make a little ribbon or jute bow and glue it on to the front of the mini wreath using 3 in 1 glue (or any glue that bonds quickly on fabric). Then glue a cute little button to the center of the bow. Knot the ends of your jute bow to prevent unraveling.
